Operational Status	

Severity Criteria

Lane Blockage Score	4
Lane Blockage Evidence	The incident vehicle is positioned perpendicularly across the intersection and light rail tracks, causing full blockage of multiple lanes of traffic and light rail operations.
Lane Blockage Confidence	0.9
Vehicle Count Score	2
Vehicle Count Evidence	Two vehicles are visibly involved in the incident.
Vehicle Count Confidence	0.9
Vehicle Type Score	1
Vehicle Type Evidence	The involved vehicles appear to be passenger cars (sedan/SUV/minivan).
Vehicle Type Confidence	0.9
Hazards Score	3
Hazards Evidence	Visible sparks and apparent flames, along with scattered debris and potential fluid spill, pose significant hazards.
Hazards Confidence	0.9
Vehicle Orientation Score	4
Vehicle Orientation Evidence	One vehicle is resting completely perpendicular to the normal flow of traffic and light rail tracks, indicating a severe and obstructive position.
Vehicle Orientation Confidence	0.9
Damage Score	3
Damage Evidence	The presence of significant sparks and flames emanating from the vehicle's underside/sides suggests substantial impact damage and deformation.
Damage Confidence	0.9
Debris Extent Score	2
Debris Extent Evidence	Debris is scattered across multiple lanes within the intersection, indicating a moderate extent of debris.
Debris Extent Confidence	0.9
Fire Visible Trigger	YES
Rollover Confirmed	NO
Major Structural Collapse	NO
Full Roadway Blocked	YES

Large Debris Field	YES
Critical Unknown Count	0
Should Return Unknown	NO
Severity Notes / Uncertainty	Override by fire_visible

Incident Information

Incident Detected	True
Status	active
Types	collision, debris
Confidence	0.9
Why	A dark vehicle is resting at an unnatural angle, perpendicular to the light rail tracks and traffic lanes, within the intersection. Significant sparks and what appear to be flames are visible from its underside/sides. Debris is scattered across the roadway, indicating a severe impact. Another vehicle is also present nearby.
Actual Accident Verified By Gemini	True
Accident Verification Status	confirmed_by_both
Accident Verification Note	Image note: A dark vehicle is observed in the middle of an intersection with significant sparks and what appears to be flames emanating from its underside/sides, indicating a severe impact or collision. A trail of debris and additional sparks are visible across the roadway, consistent with a vehicle accident. Video note: At 00:04, a dark sedan turning left collides with a dark SUV/minivan going straight through the intersection. The impact causes significant sparks and debris, and the SUV/minivan comes to a sudden stop, resting perpendicularly on the light rail tracks. Both vehicles appear to have been involved in a high-impact collision.

Verification Details

Image Verification	True
Image Note	A dark vehicle is observed in the middle of an intersection with significant sparks and what appears to be flames emanating from its underside/sides, indicating a severe impact or collision. A trail of debris and additional sparks are visible across the roadway, consistent with a vehicle accident.
Video Verification	True
Video Note	At 00:04, a dark sedan turning left collides with a dark SUV/minivan going straight through the intersection. The impact causes significant sparks and debris, and the SUV/minivan comes to a sudden stop, resting perpendicularly on the light rail tracks. Both vehicles appear to have been involved in a high-impact collision.

Vehicle Summary

People & Injuries

People Visible	0
Injuries Visible	UNKNOWN
Injury Signs	

Hazards

Fire	YES
Smoke	YES
Debris	YES
Fluid Spill	YES
Notes	Significant sparks and what appear to be flames emanating from the underside/sides of the primary collision vehicle. A trail of debris and additional sparks are visible across the intersection.

Lane Impact

Lanes Affected	intersection, light rail tracks, lane 1, lane 2
Shoulder	NO
Traffic Flow	stopped

Location in View

Region	center
Distance	medium
Lane	MLK JR WAY S & S HENDERSON ST intersection
Shoulder	N/A
Statement	The collision occurred in the intersection of MLK JR WAY S & S HENDERSON ST, involving the light rail tracks.
